

# SEATTLE'S BEST PEST DETECTION

**Occupants should vacate unit for inspection.**

**ONLY Pull bed away from wall:** Allow an approximate 2 feet of pathway 360 Degrees around bed wherever possible. Remove items from under or around bed. Please do NOT strip bed or pile items on bed or couch.

**Remove all animals prior to inspection:** Animals in or around unit during time of inspection can create negative conditions. Animals that cannot be removed need to be contained in a carrying device and placed in bathroom with note on the door. **Dogs must leave the unit.** Pick up animal food and toys off of floor.

**Have no food out:** Food odors can distract the canine. Pick up dishes and remove food containers from inspection area. Stow food and remove garbage prior to inspection.

**General cleanliness:** All areas should be tidy, free of clutter, and vacuumed. Clothes and all other items should be off the floor. Please unplug and stow portable electronic devices, laptops and such. Allow access to closets.

**Turn off Electronics:** T.V.s, Radios and fans should be turned off during inspection.

**Alert handler to previous pesticide applications. Do not use incense, essential oils, carpet fresh or any other fragrance prior to inspection.**
